CONTINENTAL M17
Memory Craft 15000
SKYLINE S9
Also usable on any embroidery sewing machine with JEF+ compatibility
AcuSketch v2.31

Available for Tablets
iOS 13.0 or later, Android 6.0 or later

With this application you can create embroidery designs for quilts or patchwork quilts by tracing or drawing on the canvas displayed on the iPad screen with your finger or a stylus. You can also create your very own illustrations and sketches and easily convert them to embroidery designs. Simple to use and fun for all ages!!

Point 1 Set the embroidery work area first

Measure the length and height of where you want to sew with a ruler and enter the length and height on the app.

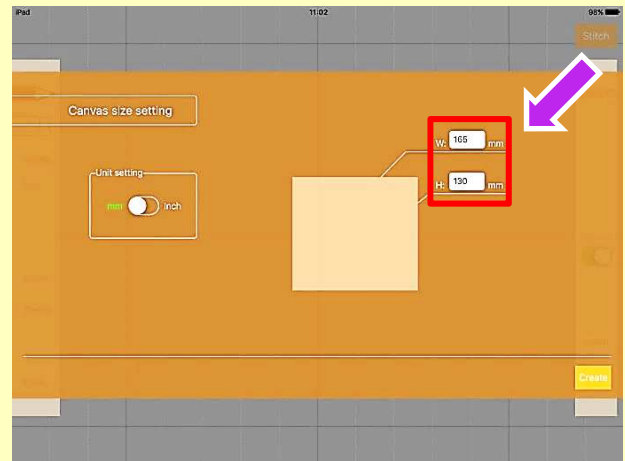

Point 2 Take a photo with your iPad of the sketch you want to use and then trace

Insert the iPad image and trace the design by finger or stylus. The lines are shown in gray and are easy to see. The color of the lines can be selected as well.
You can also draw a design directly on the app without a sketch.
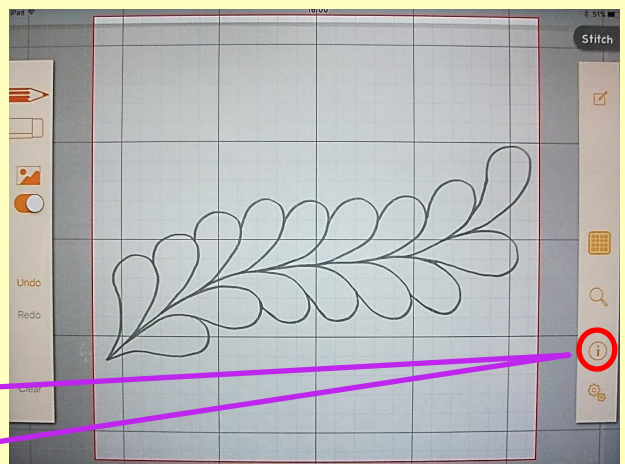

*By tapping the information icon, you can take a "Tour" which explains how to use each main icon.
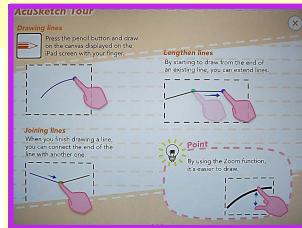

Point 3 Convert image to embroidery data

You can set the stitch length you want and also choose to include locking stitches or not.

*You can send your designs via WLAN. Save the designs on your sewing machine.

Point 4 Export function for embroidery designs

You can send your created design to CM17, MC15000 and SKYLINE S9 via WLAN or export the design to other applications as a JEF+ file. This means that AcuSketch can now also be used with non-supported WLAN capable machines.
(Embroidery machines which are JEF+ compatible.)

*Export to AcuEdit

Tap AcuEdit icon; AcuEdit starts and the JEF+ file which is exported from AcuSketch is displayed on the main screen.
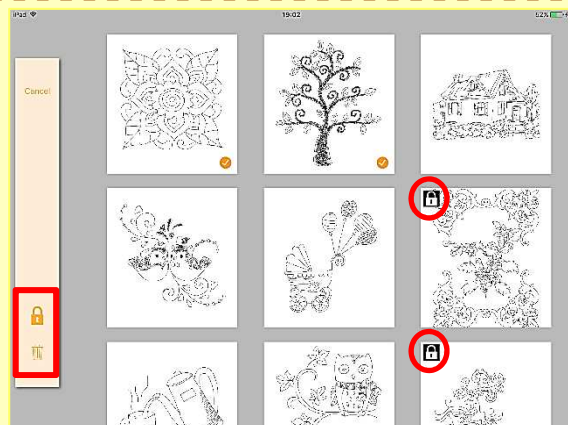

Point 5 Save function for sketched designs

Save your drawing in AcuSketch.
The most recently saved file is displayed first.

The canvas sizes for each drawing are shown when you tap 'Details' button.

Tap 'Details' button
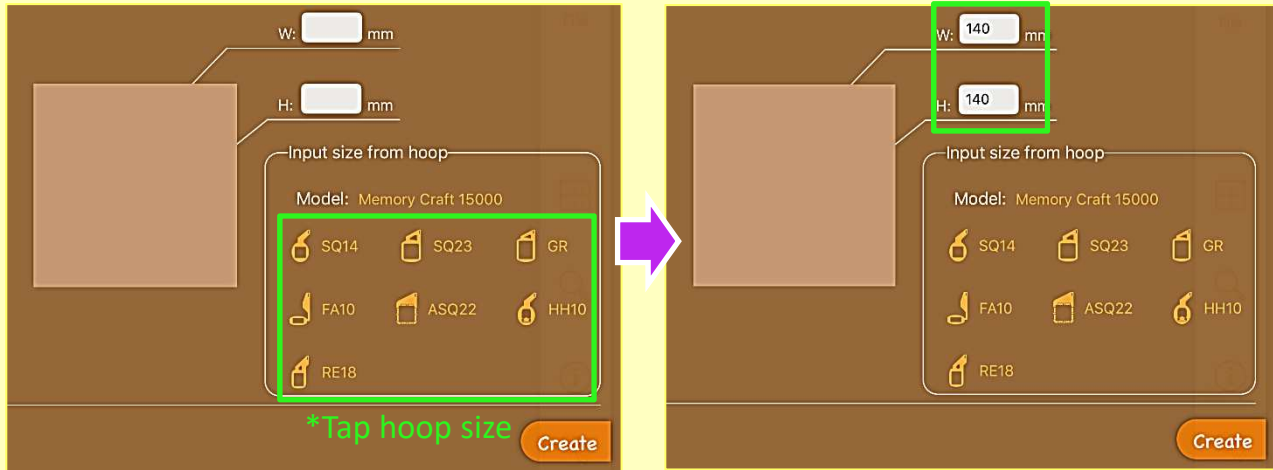

Canvas(W x H) : 230 x 300 mm
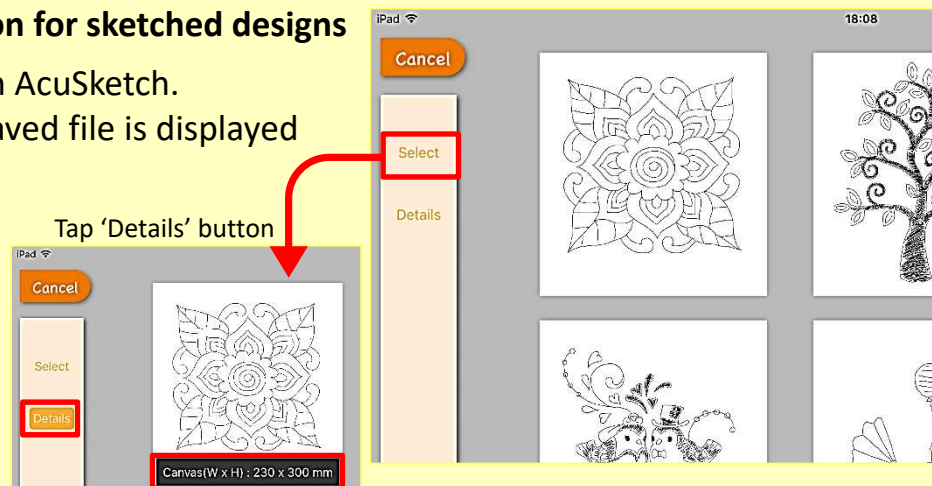

You can choose 'Delete' or 'Lock' for each drawing file. When you select 'Lock', it prevents accidentally deleting the file.

Point 6 Function for inputting canvas size

When you choose the hoop size, the size is automatically entered as canvas size.
(For CM17, MC15000 and SKYLINE S9 only)

*Tap hoop size

*You can enter hoop size manually when you use other embroidery models.

Point 7 Stitch simulator

Simulate the actual embroidering of the stitches that you have created.

Fast forward and Rewind using the slide bar.

You can choose the speed from 3 levels.
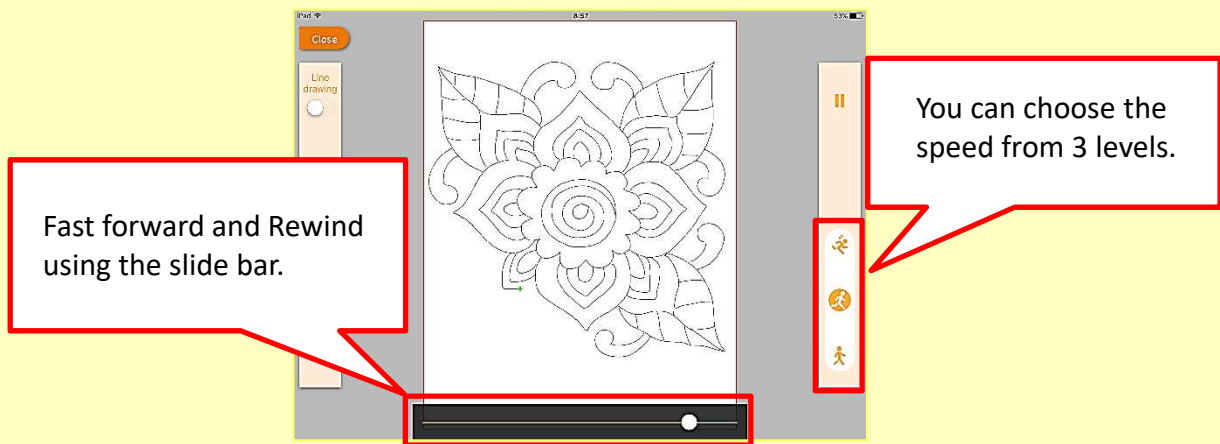

*Embroidery Sewing Machines with JEF+ compatibility:

```

Point 8 Various Stitch Types

The contents of the "Line stitch pack" is shown to the right:

Triple stitch   **ZigZag stitch**   **Stem stitch**

Point 9 In-App Purchase System

You can add the 3 types of stitches using the In-App Purchase system.

Tap the stitch type.

Tap the cart mark. (This mark indicates the pack is not purchased yet.)

Tap the price and then input your Apple ID and Password to pay.

After payment, the cart mark disappears and you can use the 3 new types of stitches!
