

For CoverPro Models

New "Tape Binder and Binder Foot with Guide" and "Tape Stand"

This binder set can be used to create a beautiful binder finish like on ready-made T-shirts. It is the most popular set among optional attachments for cover stitch sewing machines. There are 2 binder sizes: finished width 8 mm (for 32 mm tape) and 12 mm (for 42 mm tape) These are sold separately.

In addition, a new Tape Stand which is very useful when used together with the binder set, has also been released.

***Finished width 8mm for 32 mm tape (use right needle): 202-327-008**

***Finished width 12mm for 42 mm tape (use right and center needles): 202-328-009**

***Binder Foot with Guide (foot only): 796-402-004**

Note: If you already had previous "Tape binder set", we recommend you to purchase "**Binder Foot with Guide (foot only)**" and "**Tape Stand**".

Point 1: A transparent binder foot with guide

A clear version of the existing metal binder foot has been made, the shape has been improved and guides have been added for ease of use.

Main improvements

- The clear foot means improved visibility
- As a guide is included on the right side, tape is held stably without escaping to the right.
- The foot is long at the front and short at the back (compared with the existing foot)

① Long front ⇒ Feeds the fabric effectively. The distance between the binder and the foot is short so the tape doesn't sag

② Short back ⇒ Feeding is good even on uneven parts such as seams, as skipped stitches are prevented and stable stitching is realized.

For CoverPro Models

*Tape Stand: 202-323-004

Point 2: Tape Stand

Since the tape is supplied at the same height to the tape guide of the binder set (③ in photo to the right), it feeds smoothly even with very soft fabric allowing beautiful finishes to be achieved.

Using the Tape Stand together with the binder set is recommended.

Supply the tape at the same height as the binder

Tape Stand

The height of the tape plate holder can be adjusted according to your preference. By aligning the height with the tape guide, you can supply tape without it sagging.

Point 3: The role of winding rods

Wrap the tape to be used for the binder in advance around a winding rod made of paper, and pass the shaft of the tape stand through the hole in the paper rod.

Tape can be supplied smoothly by the rotation of the winding rod.

For convenience, it is suggested to prepare paper winding rods for your fabric in advance.
