JANOME BULLETIN

For CM17/MC15000/MC14000/MC12000
MC9900/MC9850SE/MC9850
Skyline S9/atelier 9
MC550E/MC500E
MC450E/MC400E
And other embroidery sewing machines that
are compatible with the JEF+ format.

AcuStitch

JANOME's Patented Technology
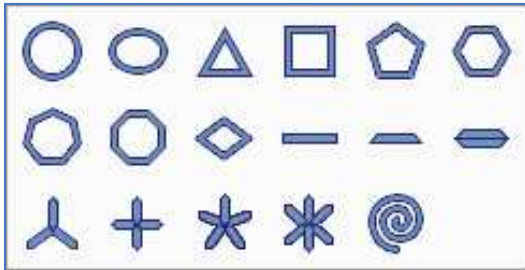

for Windows 8.1/10/11

AcuStitch helps you arrange stitch data in succession, assisting you to create embroidery data for various shapes.
This software has functions to easily make beautiful shapes such a Polygons (corner alignment), Radial shapes (centering), Circles and ellipses (joining start and end points) etc.

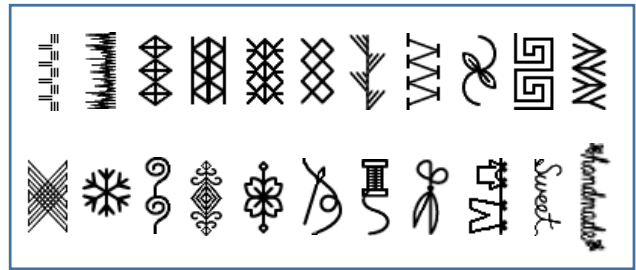

Point 1 Various kind of shapes and abundant stitch patterns

Create designs from 17 different shapes and choose from 117 different stitch patterns to utilize in your work.
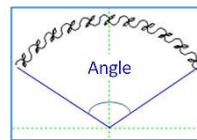

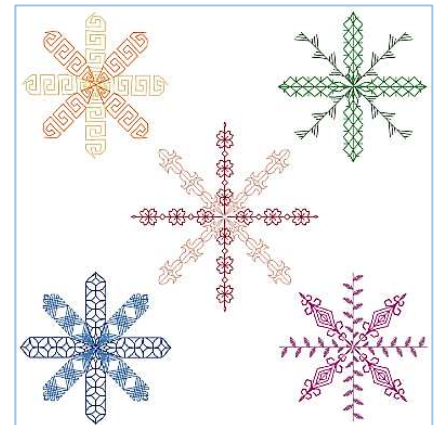

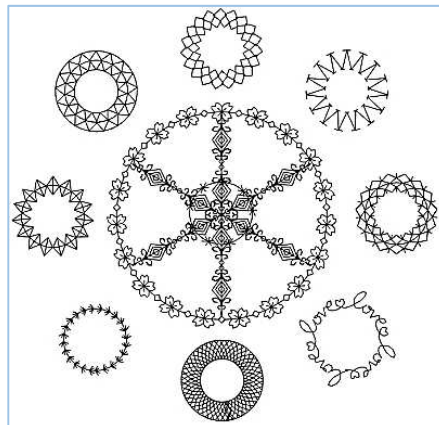

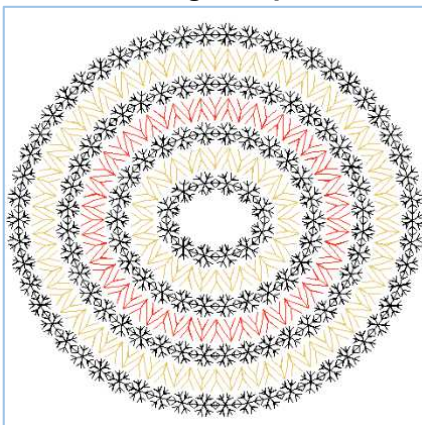

Shapes

Sample for Stitch patterns

Point 2 Easy-to-use functionality

Designs can be created automatically with simple settings.
Corner alignment, center alignment, start point and end point alignment can also be done automatically.
By simply changing the angle setting, you can create arcs and variations of your design.

Point 3 Creating original embroidery data

StitchComposer

"Stitch Composer" software for creating stitch data is included in the software installation DVD.
You can create your own original stitch data with Stitch Composer and then create embroidery data for various shapes by using this stitch data with AcuStitch.
