# JANOME BULLETIN

Engraved Foot Holder

When you buy the optional accessories, finding the right accessories for your Janome sewing machine is important, you need to know what kind of machine you have.

Horizontal Hook model or Oscillating Hook model ? In addition to that, two points need to be determined. Which type of foot holder is it?

We have made it easy to determine by engraving on the foot holder that comes with the sewing machine.

Point 01 — How to identify your foot holder

If you know which foot holder you have, you will know which accessories are available.
Please look at the foot holder, which should have a number 5, 7 or 9.
If your foot holder has "7" engraving, you can use "for 7mm max. stitch width machines" accessories.

Engraving	5L	7L / 7H	9H
Accessory Mounting Sheet Labeling	"for Oscillating Hook Models"	"for 7mm max. stitch width machines" "Horizontal Hook Models"	"for 9mm maxium stitch width"

*For user of 5mm max. stitch width sewing machine
Some of the accessories "for 7mm max. stitch width machine" have detailed scales(e.g. Bi-Level foot, Edge stitch foot). If you use a sewing machine with a maximum sewing width of 5 mm, feet with detail scales may not work correctly because the values are out of alignment.

Point 02 — Shank height

Shank Height is only needed if you require a presser foot that attaches directly to the presser foot bar.
High Shank ? Or Low Shank ? If you need this judge, please find the L or H alphabet on your foot holder. L means "Low shank". H means "High shank".

Note

In the production of new sewing machines, sequentially engraved foot holder is included as standard accessory. If you purchased your machine before the changeover, or if you purchased a sewing machine with foot holder that does not have an engraved, the hold-down holder with engraving will not be included in the package.

Tips

We have other ways to identify it, so please check it!
