CONVERTIBLE FREE MOTION QUILTING FOOT SET

Have you been waiting long? The Free Motion Quilting Foot has been enhanced and will be available in both low shank and high shank versions.

Convertible Free Motion Quilting Foot Set
for Memory Craft Embroidery Machines and High Shank Models
Part No.: 202001003 (Blister package)

Convertible Free Motion Quilting Foot Set
for Low Shank Horizontal Rotary Hook Models
Part No.: 202002004 (Blister package)
Note: Low shank version comes with quilting plate.

Point 1

Choose a foot to match your free motion quilting style

Set includes three different feet that attach to the holder with a screw for maximum sturdiness and safety. This is an important tool for bringing your projects to a higher level of perfection. Three options give this accessory more convenience, better operation and added value.

Closed-toe foot

For general use
Lace or catchable fabrics

Open-toe foot

For general use
Extra visibility

Clear view foot

For uneven surfaces and
evenly spaced quilting

~New Accessory~

Point 2

Utilitarian structural design

This is where the Janome engineers have made this a great foot. Notice that clearance has been added to the back of the foot. This important detail gives you better visibility and means that nothing gets in your way for the smoothest free-motioning possible. And of course, you can adjust the foot height for perfect skimming of the fabric surface.

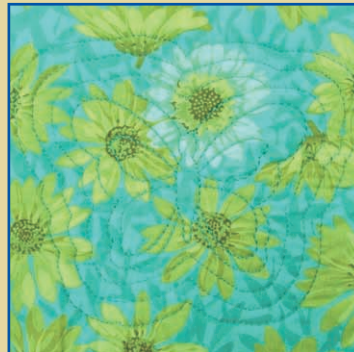

Adjust foot height

Point 3

New Clear view foot

This clear view foot includes 1/8" marks for even spacing when echo quilting without having to mark your fabric beforehand. This foot also has a convenient slot opening for quilting thick fabrics, and even allows zigzag stitching for free-motion appliqueing.

Bobbin Holder for Free Quilting and Hand-look Quilt Stitch

NEW!

In addition to the popular free-motion bobbin holder for auto-thread cutting models, a new low-tension bobbin holder is now also available for top loading models not equipped with an auto-thread cutter.

Couple the convertible FMQ foot with this handy bobbin holder preset with lower tension to make it even easier to achieve even tension control. Try it and you will see how it is more effective than upper thread tension adjustment alone.

Marked with blue to differentiate from standard bobbin holder.
