19,331,378 shares at the end of December 2021

19,331,443 shares at the end of December 2020

* Explanation regarding the appropriate use of result forecasts, and other special items

The forward-looking statements stated in this report include expectations based on assumption, forecast and projection by our management available as of the date of their announcement. It is possible that actual results may differ materially from these expectations due to various factors.

^{*} This quarterly financial report is exempt from audit procedures.

1. Qualitative Information Concerning Financial Results for the 3rd quarter of the fiscal year ending March 31, 2022

(1) Explanation of financial results

During the nine-month period ended December 31, 2021, the continued rollout of COVID-19 vaccinations led to growing resumption of economic activity in Japan and overseas. However, there was still a strong sense of uncertainty about the future outlook, including the rapid spread of a new coronavirus variant particularly in Europe and the United States, which was said to be highly infectious, and growing concerns about a sixth wave of infections in Japan.

Under these circumstances, Janome Group has worked to further strengthen sales of sewing machines across a wider range of customers and to realize a recovery in the industrial equipment business at the earliest opportunity, while continuing to take robust infection prevention measures. However, a sharp rise in component and raw materials prices, as well as difficulties in procuring parts, have had a significant impact on profits.

As a result, during the nine-month period ended December 31, 2021, sales were 32,363 million yen (down 281 million yen compared to the corresponding period of the previous fiscal year), operating income was 2,776 million yen (down 1,032 million yen), ordinary income was 2,719 million yen (down 1,073 million yen), and profit attributable to owners of parent was 1,862 million yen (down 1,137 million yen).

The performance by segment is outlined below.

<Household equipment>

In the household equipment business, although the pandemic continued to exert an impact, including logistics delays due to a shortage of container ships and difficulties in procuring parts, it has also re-focused attention on the appeal of sewing machines, with expansion particularly of medium- and high-end models in the overseas sewing machine markets of North America, Europe, and Oceania. Sales volumes also grew in the Middle East, Russia, and Asia, exceeding the previous year's level, and consequently sales were strong overall.

In the domestic sewing machine market, we continued to hold workshops and other types of sewing-related events, which have been well received, in order to further stimulate the market.

As a result, total sales of sewing machines (overseas and Japan combined) amounted to 1,230,000 units (down 130,000 units from the corresponding period of the previous fiscal year), and in the household equipment business overall, while sales were 26,134 million yen (down 1,064 million yen), operating income was 2,656 million yen (down 1,274 million yen).

<Industrial equipment>

In the industrial equipment business, capital investment conditions improved as economic activity resumed, and inquiries for both desktop robots and servo presses increased and began to recover. On the production side, however, the impact of difficulties in procuring parts remains a cause for concern.

In the die-casting business, orders increased in line with a recovery in the industrial robot market, particularly in the automotive sector, and performance was solid.

As a result, in the industrial equipment segment overall, sales were 4,096 million yen (up 732 million yen compared to the corresponding period of the previous fiscal year), and operating loss was 123 million yen (operating loss was 292 million yen in the corresponding period of the previous fiscal year).

< IT >

In the IT business, which includes IT software development, information processing services, and system operations / management contracts, sales totalled 1,665 million yen (up 82 million yen compared to the corresponding period of the previous fiscal year), while operating income was 245 million yen (up 84 million yen).

(2) Explanation of financial position

As of December 31, 2021, total assets on a consolidated basis were 54,003 million yen (up 329 million yen from the previous fiscal year ended March 31, 2021).

Current assets were 27,306 million yen (up 290 million yen from the previous fiscal year) due to factors including an increase in Merchandise and finished goods and a decrease in Cash and deposits.

Fixed assets were 26,696 million yen (up 38 million yen from the previous fiscal year ended March 31, 2021) due to factors including an increase in deferred tax assets and a depreciation of tangible and intangible assets.

Current liabilities were 14,157 million yen (down 1,039 million yen from the previous fiscal year) due to factors including a decrease in Short-term loans payable, while fixed liabilities were 8,132 million yen (down 27 million yen from the previous fiscal year) due to factors including a decrease in long-term lease liability.

Net assets were 31,712 million yen (up 1,396 million yen from the previous fiscal year) due to factors including an increase in Retained earnings.
